[00:34:00] We ask that you would give us wisdom and insight to not look at others as others, but as self, that we might love one another, that we might have compassion, honesty, courtesy, leadership, God, that those things that we do would be done for the good of the community.

Senator has the floor. Thank you, Madam

[00:39:15] President. Madam President, today I rise to recognize five outstanding leaders who have been serving in our office during this General Assembly as my interns. These students have supported our legislative work, helped our team stay organized during this fast-paced session, and gained a first-hand understanding of how public policy is shaped here in the Commonwealth.

[00:39:40] So first we have Charlotte Bray and Madam President what I asked them to do was give me three to five sentences about themselves. So this is not what I'm saying about them, it's only what I have approved them saying about themselves.

[00:39:57] First we have Charlotte Bray, a current undergraduate student at the University of Richmond on a pre-law track. Charlotte is a graduate of the Maggie L. Walker Governor's School in Richmond and has continued to stay deeply engaged in public service and community involvement with the Richmond area. She joined our office this session eager to see the General Assembly in action and has been a thoughtful and dependable member of our team. We also are joined by Chloe Beers, a senior at Virginia Commonwealth University majoring in philosophy with

[00:40:33] a concentration in ethics and public policy and a minor in art history. Chloe currently serves as a senior researcher at VCU's philosophy of AI research lab. After graduation she plans to attend law school and pursue a career in public defense. Her analytical mindset and commitment to justice have been tremendous assets to our office.

[00:41:01] Next is Kamiya Wingate, also a senior at Virginia Commonwealth University, majoring in political science with a minor in Africana Studies. Kamiya is passionate about public policy, civic engagement, and addressing issues that affect marginalized communities.

[00:41:22] And after graduation, she plans to continue her education in public policy with a focus on civil rights advocacy. And Madam President, I will say about Kamiya, she is a testament of tenacity. She called us, she emailed us, she stopped by our office, she called us and emailed us some more until we finally said, we have got to find a place for this child in our internship, and so we did.

[00:41:47] So tenacity pays off. We are also grateful to have Marshall Babs, a senior at Old Dominion University, my alma mater, majoring in political science and graduating this May. She plans to attend law school and pursue her Juris Doctorate and is particularly interested in criminal law, civil rights, and immigration law.

[00:42:10] Her dedication to advocating for justice and protecting the rights of underserved communities is clear in the way that she works. And Marcelle started out with us, Madam President, in the summer and she interned through the fall and applied for the ODU internship program.

[00:42:28] So she kind of got the soup to nuts version of an internship program understanding before session and during session. And finally, we have Javion Tucker, a proud Virginian and political science scholar at Norfolk State University.

[00:42:45] Javion is deeply committed to youth mentorship, civic engagement and community leadership. He currently serves as the NAACP first Vice President for the Youth and College Division of Virginia, is President of the Norfolk State Young Democrats, and previously served as a political director.

[00:43:04] His experience in social justice policy and advocacy has brought valuable perspectives to our team. Madam President, the General Assembly moves quickly, and the work we do here is made possible not only by members and staff, but also by young people like these who dedicate their time to learning and serving.

[00:43:24] Their hard work, curiosity, and commitment to public service have strengthened our office this season. I wanna personally take the opportunity to thank Charlotte, Chloe, Kamiya, Marshall, and Javion for their dedication and contributions to my office and my team.

[00:43:41] I hope that we have provided them with a premium intern experience, setting the bar high for their future endeavors. Madam President, please join me in congratulating and welcoming my interns to the Senate.

[00:43:57] - Thank you, Senator, for that introduction. And the Senator has provided such a considerable degree of information about the remarkable work that each of you has done. And we're delighted that you were able to serve as interns in her office. And I know not only did you learn a lot, but you also contributed so much.

Over the years, its members have expanded efforts in humanitarian assistance, education, cultural diplomacy, and advocacy.

[00:47:45] This work carries particular significance in Hampton Roads, home to the largest concentration of military forces in the world, where international cooperation and global engagement are part of everyday life. Thank you, Madam President. Members of the Senate, the bill as it passed out here is a section one bill directing various stakeholders to take a look at the fire safety fund and how that is going to be distributed. The Senate version included members of the money committees as a part of the work group as well as having that work group report back to the money committees the house version just took the money committee's members off of the work group and but they don't they don't need to be there but they will get the

[01:11:35] report back at the end so again I would renew my motion that we concur with the house substitute the question is shall the Senate concur with the house substitute for Senate bill 233 all in favor of that motion will record their votes aye those opposed no are the senators ready to vote have all the senators voted. Do any senators desire to change their vote? The clerk will close the roll. Ayes 40, no 0. Ayes 40, no 0. The Senate concurs. Senate Bill 302 has

[01:12:10] passed the House with a substitute. The senator from Isle of Wight. Thank you, Madam President. I ask that bill go by for the day. Without objection, Senate Bill 302 goes by for the day. Senate Bill 528 has passed the House with a substitute. Senator from Franklin County. Thank you Madam President I now move that we concur with the house substitute and speaking to that motion for Senate Bill 528. Senator has the floor. Madam President we just had some technical

[01:12:48] amendments on this bill right there to straighten up so everything was uniform of when when a someone was incompetent could be restored without having to go to jail or either stay in jail or to have a bed I made for them at one of our State Hospital. So cleared up the differences. It's ready to go now and I ask that you concur with the House substitute. The question is, shall the Senate concur with the House substitute for Senate Bill 528? All in favor of that motion will record their votes aye. Those opposed no. Are the senators ready

[01:13:22] to vote? Have all the senators voted? Do any senators desire to change their vote? The clerk We'll close the roll. Ayes 40, no 0. Ayes 40, no 0.

[01:13:37] The Senate concurs. Senate Bill 530 has passed the House with the substitute. The junior senator from Loudoun. Thank you, Madam President. Madam President, I move that the Senate concur with the House substitute and speaking to that motion. Senator has the floor.

[01:13:53] Thank you, Madam President. As a reminder, Senate Bill 530 is my bill that seeks to modernize the reporting process under Virginia's Conflict of Interest Act, so that by 2030, all the required filers will file their disclosure forms electronically with ethics council system. The House substitute makes a minor change to keep the responsibility of confirming the SOEI filings with local registrars, clerks, and the Department of Elections. Since the council does not track who is running in local or statewide elections, they cannot practically confirm all filings. Madam President,

[01:14:30] i reiterate my motion that the house substitute be agreed to thank you the question is shall the senate concur with the house substitute for senate bill 530 all in favor of that motion will record their votes aye those opposed no are the senators ready to vote have all the senators voted do any senators desire to change their vote the clerk will close the roll Ayes 40, noes 0.

[01:14:55] Ayes 40, noes 0. The Senate concurs. Senate Bill 620 has passed the House with a substitute. Senator from Western Henrico. Thank you, Madam President. Madam President, with the

recommendation that we reject the House substitute, I'm going to move that House substitute in speaking to that motion.

[01:15:16] Senator has the floor. Thank you, Madam President. Madam President, members of the body, we are working through this process. This is the tobacco regulating tobacco vape products bill that I took over for Senator Eben. And we are working with stakeholders in the House, but we need to go to conference to finalize it.

[01:15:33] So I recommend rejecting, and I move the substitute. - With the recommendation that it be rejected, the question is, shall the Senate concur with the House substitute for Senate Bill 620? All in favor of that motion will record their votes aye.

[01:15:49] Those opposed, no. Are the senators ready to vote? Have all the senators voted? Do any Senators desire to change their vote? The Clerk will close the roll. Aye zero, no's 40. Aye zero, no's 40. The Senate does not concur. Senate Bill 645 is passed the House with a substitute.

[01:16:10] Senator from Eastern Fairfax. Madam President, I ask that bill go by temporarily so I can accurately explain it. Without objection, Senate Bill 645 goes by temporarily.

[01:16:30] Senate Bill 688 is passed the House with a substitute. Senator from Eastern Fairfax. Thank you, Madam President. I move that we concur with the House substitutes being the, well, actually, with the recognition we rejected, I move that we concur with the House substitutes being the motion.

[01:16:46] Senator, how's the floor? Thank you, Madam President. Ladies and gentlemen, Senator, if you remember this bill, this is the one that basically, it's a campaign finance trigger law. It creates campaign contribution caps and limits, prohibits corporate contributions, et cetera. However, none of it goes into effect until Citizens United has been either reversed by the US Supreme Court or constitutional amendment the house loved the idea of citizens United being a horrific thing they didn't like the rest of the bill

[01:17:21] and they basically struck everything from the bill except for a statement that citizens United is a really bad case given that I'm not really sure what the bill does anymore and we typically don't sort of announce our intentions about Supreme Court cases by legislation and so this thing needs to go into conference to figure out if there's anything that could be salvaged. My guess is you probably won't see anything come out of conference but I'd like to go put it there to take a little nap and so if we could reject the substitute I'd

[01:17:55] appreciate that. With the recommendation that it be rejected the question is shall the Senate concur with the House substitute for Senate bill 688 all in favor of that motion will record their votes aye those opposed no are the senators ready to vote have all the senators voted do any senators desire to change their vote the clerk will close the roll zero knows 40 I zero knows for knows 40 the Senate does not concur Senate bill 749 is passed the house with

[01:18:33] a substitute senator from central Fairfax thank you madam president I move that the Senate concur with the house amendment and speaking to that motion senator has the floor thank you madam president madam president Senate bill Well, 749 is to ban the sales of assault weapons in the Commonwealth along with high-capacity magazines.

[01:18:55] The amendments that the House version and this version came up with, the difference is to clean up a loophole that was left in the language about the sales of high-capacity magazines along with the ban of the assault weapons themselves.

[01:19:11] It does not ban possession of any types. We also cut the difference between the 10 rounds versus the 15 and decided that the 15 rounds is where we will go to set the minimum to. The same goes for fixed magazine weapons. We drew the line at 15.

[01:19:27] We also allowed the attached tubular device, which is typical of rifles commonly owned and used for shooting coyotes and things of that nature. For handguns, we define assault weapons based on having two combat features, which is how we get pistols that look more like submachine guns.

[01:19:51] We do not use detachable magazines as a qualifier for assault weapons because it's a very common feature. We also cut the difference between the two bills around exceptions that are made for active and retired law enforcement officer uh cadets federal firearm license dealerships uh gunsmith antiques and to sell any weapons or magazines to ffl or outside state buyers this simply is now a ban on the sales of assault weapons starting july 1st of 2026

[01:20:29] madam president this is a bill that i've been working on since i got here with some of my colleagues here where we based this policy based on the 1994 federal band where as soon as that went into effect we saw mass shooting fall by 37 percent where assault weapons were used and as soon as that band was lifted that number rose by 183 percent so we can no longer say that there's no real data and this is gonna get upheld by the courts and all of that where this has already been in place nationwide before and with that Madam President I renew my motion that we agree to the

[01:21:07] House amendments. Senator from Franklin County. Thank you Madam President. Speak to the House substitute. Senator has the floor. Madam President I've sat here this whole session. I've sat in courts committee. I've watched gun bill after gun bill that seeks to eliminate the ability to sell them, possess them, own them in the Commonwealth of Virginia. This has been an effort that's been going on for decades. And now we're right here at the moment where we are

[01:21:43] determining this is a bad firearm, this is a bad firearm. I heard on his list pretty much everything's a bad firearm. But I want to remind the body, Madam President, that there are millions of Virginians who own firearms. And of those millions of owners who own one or more firearms in the Commonwealth of Virginia, they own billions of pieces of ammunition. If we were the problem, you would know about it. We are not the problem. The legal, lawful gun owners, good citizens

[01:22:22] of the Commonwealth of Virginia are being punished with pieces of legislation like this. And I pray, Madam President, I pray that a Supreme Court of this state or any federal Supreme Court votes this piece of legislation, if it is signed in law, down as unconstitutional.

[01:22:41] We should stop injuring, harming the people who are law-abiding citizens, especially in my region. I was just looking here at a statistic. Of all violence committed with a firearm, less than 2% are lawful gun owners.

[01:22:58] What we should be doing instead of these pieces of legislation is we should be making it harder for the criminal to get a gun, punishing that criminal that uses that firearm in the commission of offense, and that is how we promote and will achieve gun safety in the Commonwealth of Virginia.

[01:23:15] I thank you, Madam President. Senator from King George. speaking to the amendment. Senator has the floor. Thank you, Madam President. In addition to the Senator from Franklin's comments, I just wanted to add one thing. We established in the courts committee and elsewhere that the way these bills are drafted, the only thing that this bill is going to do is make a bunch of honest, law-abiding gun owners criminals. And unfortunately, it is not going to do one thing to stop criminals from using them or stop mass shootings.

[01:23:54] Senator from Isle of Wight. Thank you, Madam President. Speaking to the bill. Senator has the floor. Thank you, Madam President. Oftentimes we talk in this chamber about the merits of a bill, and as a non-attorney, I leave it up to the attorneys to go through and talk about the legal aspects of a bill. But more important, I think, are the people that this legislation is going to affect, and we need to talk about the life experience.

[01:24:22] About a little over 10 years ago, lived alone, had bought my first home, had a neighbor on either side, and everything around that was cows and farmland. My next door neighbor let me know in advance she was going out of town, and she was going to be gone for a week or two. And my other neighbor, they traveled quite a bit. Well, one night I heard something, and in the country you don't really hear a whole lot unless it's probably a rooster in the morning. But I heard someone breaking into my neighbor's home. I looked out my side window and I saw two armed men entering her

[01:24:58] home. I got on my phone. I hid. And the only equalizer I had in my room was a firearm, Madam President. Sat there and I waited. And from the core of our city, it would have been 20 plus minutes for someone to be able to arrive. The biggest fear I had was worrying. Were they coming to my house next. The only thing I had, Madam President, was an equalizer, which was a firearm. This bill

[01:25:29] seeks to upset the balance for legal, law-abiding firearm owners and does very little to stop those that are going to proliferate guns illegally on our streets. I just wanted to add that perspective, Madam President, because that's the exact type of person who's going to be harmed by the unintended consequence of a bill that is so far overreaching that it's going to make just simply driving down the road or transporting a firearm illegal. So with that, food for thought, Madam President, I hope that my colleagues will vote against this bill. Senator from Prince Edward.

[01:26:09] Thank you, Madam President. Speaking of the amendment. Senator has the floor. Madam President, I wasn't going to speak on this, but I just, I'm seeing this pattern of we're going softer and softer and softer on criminals. And we're going harder and harder and harder on law abiding citizens. And I just, I don't feel like anybody put me in this office in Richmond to make more rules around them so that bad actors can be out on the streets without endangering the public.

[01:26:41] I think we've got a criminal justice system for that. And putting all of these guardrails, we're choking our citizens with rules. And in a country where they're supposed to be holding us accountable not the other way around the second amendment is or the second amendment is is a constitutional right we know that we have that right it's been well established that we have that right yet here in virginia we're continuing to attack it and we're not attacking on we're we're not bringing legislation that holds the bad actors accountable we're bringing legislation that holds law-abiding citizens accountable and madam president i just i don't know that i don't know

[01:27:20] that that's going to do anything other than prevent law abiding citizens from having as the senator just said an equalizer so that they have the means of defending themselves this is a terrible

trajectory that we're on here in virginia thank you the senior senator from virginia beach thank you madam president will the senator from central fairfax county rise for a question will the senator yield madam president i yield senator from virginia beach madam president i ask the senator from central Fairfax County what Virginia specific evidence

[01:27:59] shows that banning lawful purchases transfers or commonly owned firearms and 15 round plus magazines will reduce violent crime instead of primarily impacting competent owners while illegal possession persists senator from central Fairfax thank you madam president madam president I would say to to the gentleman, that we have seen when it came to the 1994 national ban, that it has reduced significantly crimes that were caused by these type of weapons that are described in this bill.

[01:28:35] And we don't need to have an incident in the Commonwealth in order for us to go do something about it. That is what I will tell the gentleman as well, is that the way this bill and the way it's defined, it is very narrow that it does not impact folks who already have them, that the law-abiding citizens could still keep them, but in terms of his question, we have data around the 1994 ban at the national level that showcases throughout the whole country, which includes our Commonwealth, that significant reduction of violence that were caused by assault weapons.

[01:29:17] - Madam President, will the Senator from Central Fairfax entertain another question. Senator will you yield? I will yield. Senator has the floor. Madam President since I got such a detailed answer of how the that it's so specific to Virginia what nationally was banned in 1994 I'll rephrase this and and open it a different way. So I asked the senator from central Fairfax County has he ever used a turkey gun senator from

[01:29:56] central Fairfax madam president to answer the gentleman's question I have not madam president I asked him further has he ever hunted turkey senator will you yield for another question I will yield and to answer the gentleman's question the answer is no madam president I asked a gentleman the senator salt you must add additional question senator will you yield i will yield for another question senator from virginia beach madam president i asked you gentlemen your firearm assault firearm definition sweeps in many standard turkey guns shotguns

[01:30:36] semi-automatic pistols and rifles based on features threaded barrels grips braces etc how will officers reliably determine probable cause on the street without arbitrarily uneven enforcement and litigation risks? Senator from Central Fairfax. Madam President, I would yield that to the senator from Eastern Fairfax. Senator from Eastern Fairfax. Thank you, Madam President. To answer the senator's question, a police officer has to have probable cause

[01:31:11] before they can interfere with somebody's liberty. And so an officer would have to have probable cause to believe that a particular magazine does not, has more than 15 bullets, or that otherwise have to have probable cause to believe that that gun is in violation of the statute.

[01:31:30] And if you read the statute, all of the characteristics which are prohibited are characteristics which can be observed using your eyeballs, looking at the piece of equipment. They're not anything you have to inspect that you would be able to figure out outside to develop probable cause. That's the best way I would answer his question.

[01:31:49] Madam President, will the gentleman for Eastern Fairfax continue for a question? I'll yield. Senator, will you yield? Madam President, I ask the gentleman that how far away does he think you would

have to be to see if a firearm has a threaded barrel?

[01:32:09] Senator from Fairfax. Madam President, I would say that the only way you can see if something has a threaded barrel or not is to look inside of it. And again, you couldn't ask to see somebody's gun unless you have probable cause to believe it has a threaded barrel. And the only other way I think you could determine if it has the threaded barrel or not is if it has either a silencer or a flash suppressor attached to it, which would then tell you it has a threaded barrel because that's the only way you can attach a flash suppressor or a silencer or whatever to one of those guns.

[01:32:35] So if you see a gun with a silencer on it, then you could check to see if it has, you could say, sir, you know, interfere with their liberty, stop them, say, I'd like to look at your gun. Otherwise, if you're just walking around with a semi-automatic handgun, you don't have probable cause to say, I'd like to do a gun inspection today.

[01:32:50] That's not how our constitution works. Madam President, will the gentleman yield for one final question? Senator, will you yield? Sure, will you. Senator from Virginia Beach. Madam President, I'm glad we've trounced on the Constitution so much that the gentleman from Eastern Fairfax is so concerned with it.

[01:33:11] I asked the gentleman from Eastern Fairfax, have you ever fired, shot, or owned a turkey rifle? Senator from Fairfax. Madam President, I would say that I have never fired, at least, well, I don't, I've never owned one. I've shot shotguns, and I assume you could shoot a turkey with a shotgun, but I'm not sure whether it was a turkey gun or not, but it was an over-under Beretta that I was shooting skeet with, so maybe. Madam President, speaking to the bill. Senator has the floor. Madam President, my concern

[01:33:49] here today is beyond us tromping on the Constitution, which we do quite well here. It goes beyond individuals from Fairfax who've never shot a turkey gun explaining on why they're now illegal for individuals who rely on those turkey guns to put protein on their table, to put protein in their freezers, to put protein on the table for their families who live outside of Fairfax, Virginia. Madam President, maybe this body would be a little bit kinder to us tromping on the Constitution if we

[01:34:29] would restrict this maybe to just Fairfax County, but I can tell you folks in my district who rely on their guns and ammunition to put food on the table, and a lot of them, that's the only protein they get in a year is what they put up every year. So, Madam President, I would hope that we vote against this, and I would hope that individuals who don't hunt, don't shoot, never held one of these weapons would rely on other individuals who have, and who rely on that to put protein on their table

[01:35:07] for their families before they passed sweeping laws across the state of Virginia to stop those individuals from being able to put protein on their table. Thank you. - The Senator from Orange. - Thank you, Madam President, speaking to the bill.

[01:35:26] - Senator has the floor. - Madam President, it's clearly evident to me a lawful gun owner who's about to be an outlaw gun owner that my colleagues on the other side of the aisle have a hard time understanding the nomenclatures and what the different parts of a barrel are versus a slap flash suppressor or a muzzle brake or a silencer or you name it madam president but let's really get down to the root of the cause madam president if we don't have the second amendment we're gonna end up like Venezuela one day or we're gonna end up like all these other countries that don't have their citizens that have the

[01:36:05] ability to fight for their freedom against tyranny and many of the other side of the aisle are worried about our current president and whether or not he's going to try to run again and all these other things that are out there and for argument's sake let's say he did how are you going to stop them well if you take away all the firearms from the law-abiding citizens I don't think they're going to be able to do anything. Madam President, during World War II, the Japanese, the only thing keeping the Japanese from invading the mainland was the fact that their understanding

[01:36:40] that nearly every household had a hunting rifle in it, and they understood what that meant to lawfully arm your citizenry. Madam President, this is just a bad bill. I hope we get some smart attorneys that are going to take this to the Supreme Court and just get it canceled, but In the meantime, there are a lot of us, and I know my colleagues on this side have spoken about it, you're going to just have outlaws out there because they're not going to get rid of their firearms.

[01:37:07] The government hasn't said they're going to buy them back. So in my opinion, it's an illegal taking, and I just would hope my colleagues would all vote no. Senator from Eastern Fairfax. Thank you, Madam President, speaking to the bill.

[01:37:23] Senator has the floor. Thank you, Madam President. you know i never thought i would hear the the home county of the founder of the united states of america and the man whose statue has been standing out there for 200 years to become a bad word around here but uh apparently uh fairfax is now a become a an adjective or a verb um that's not what this bill is about um a couple things i want to talk about that i've heard first of all year after year after year when we've when we've been debating these the 17 years i've

[01:37:59] I've been here. One of the things we always hear in the courts committee about gun owners is we hear that they're the most sort of knowledgeable, careful, law-abiding people on the planet, that they know the rules, that they follow the rules. For some reason, the other side seems to think that all these people that are law-abiding, knowledgeable, follow the rules, aren't going to be able to follow these, and they're going to become criminals. I'm kind of perplexed, because not clear how you can have it both ways um number one number two let's say that um this bill doesn't

[01:38:36] make anyone anyone in virginia a criminal it doesn't ban a specific gun that or piece of equipment that anyone owns today if you have an assault rifle you can keep it if you have an assault pistol if you if you want to have one of these pistols with a silencer on it and a pistol grip in the front, a really big, big pistol. If you want to have one with a telescope on it or

[01:39:10] lasers or whatever else you want, that's okay. You just can't buy a new one and you can't sell it to anybody. If you want to have a magazine with more than 15 bullets, you can keep that too. You just can't buy a new one and you can't sell the one you got to somebody. It also doesn't ban possession of those things unless you bought them after July 1 of 2026. That's what the bill says. It also is not a taking because the government does not make your assault rifle with its telescopes and

[01:39:45] tripods and lasers and everything else illegal you can keep it so you don't it's not valueless you can actually even sell it to a firearm dealer if you want under this bill so you can actually get money for it that means you know what it's not a taking under any interpretation of taking I've ever heard next it talks about how we're drawing some lines about bad guns and good guns

[01:40:16] You know what? Today, if we don't pass this law, if the governor doesn't sign it, you still can't own a fully automatic machine gun unless you have a certain special, very special kind of license.

[01:40:32] We have already drawn those kinds of lines in Virginia. I remember debating those before. But you know what? There's some things you can't buy today, like flamethrowers or rocket launchers. You can't have your own tank. That's the law in America today.

[01:40:49] Why? Because these are weapons of war. They're used to kill humans. They're designed to maximize human carnage and to kill people. You don't hunt animals with a tank or a flamethrower. So this is why we don't allow these things.

[01:41:09] Now the bill still allows you to have all the hunting rifles you want. The bill still allows you to buy and sell and possess all the shotguns you want. As long as it doesn't have more than seven rounds, I think, or 15 rounds. The bill also says you can have handguns. You just can't have a handgun that you can attach a silencer to it.

[01:41:33] You know who used the handgun with a silencer? The guy that shot up the municipal building in Virginia Beach. How many lives do you think might have been saved if he hadn't used the silencer? Just curious. If people had heard the shots and they hadn't been quiet, how many lives do you think would have been saved?

[01:41:55] Madam President, this bill is going to save lives. There's all kinds of data. We could talk about all day long about how these weapons are over presented in firearm death cases and I'll remind the body that when we had a crime commission meeting in December one of the presentations we heard was the amount of money that it cost Virginia every year for firearm injuries We heard from the Virginia Department of Health that firearm injuries in Virginia cost this state

[01:42:31] $750 million, $750 million in health care costs a year. That doesn't include time off work, doesn't include lost jobs, doesn't include the dead people and the value of their lives over the rest of their lives. A lot of these, by the way, are suicides, of a note. Although those don't really result in health care costs. The people who live that cost us health care. And I want you to think about that for a second. $750 million that cost us in health care costs. We have 8 million Virginians. That means $100 a person.

[01:43:07] $100 a year of what you pay in health insurance is paying for somebody's firearm injuries. $4,000 sitting in this room, out of every single pocket in this room, not including your family members, is going to pay for firearm injuries.

[01:43:24] If you have a four-person family, you're paying $400 a year because some people can't stop from shooting other people that live. Think about that. And that doesn't include the lost wages and everything else. This bill is a targeted public policy solution to a really bad problem that will make our state safer.

[01:43:45] we need to pass it. The senior senator from Virginia Beach. Madam President will the gentleman from I'm sorry will the senator from Eastern Fairfax rise for a question? Will the senator yield? Oh you. Senator from Virginia Beach. Madam President I asked the gentleman how many of those individuals were not committing a crime that he was referring to? Senator from Eastern Fairfax.

[01:44:21] Thank you Madam President. I'm happy to share the PowerPoint we received with the senator but I believe that a part of health differentiates between self-defense crimes or accidents I'm not sure it's possible to get that kind of data but I would surmise that most of those situations probably involve crime

but the data doesn't parse that out senator from Virginia Beach madam president I was going to talk about what happened in Virginia Beach but I asked the

[01:44:53] gentleman how was the individual does the senator the senator wish the senator to yield. Yes, Madam President. Senator from Eastern Fairfax, will you yield for another question? I'll yield. Senator from Virginia Beach. Madam President, I asked the Senator from Eastern Fairfax, how many of the individuals does he think would be saved, and how does he think that the

[01:45:23] individual who was stopped was stopped? Does he think it was from a criminal with a gun? Senator from Eastern Fairfax. Madam President, what I do know is that the weapon used was an H&K USP compact tactical .45 caliber pistol equipped with a suppressor and also a .45 caliber Glock 21 pistol, which he never used. And that he had, I guess, numerous magazines, I think 15 round magazines if I'm not mistaken. And I would just submit that if I were in a building and I were

[01:46:01] hear something, what I thought sound like firearm or shots going off, I would get out and run as fast as I could. And if you got somebody who's in there shooting up a building with a silencer and you have no idea people are even being shot, you're just going to sit there until you're shot yourself. And so I haven't read the police report. I don't know who found out what, when, where they were shot or what room they were in, but I would submit that if he was using a noisy gun, probably a lot fewer people would have been killed. It's my suspicion. Found the president speaking to the

[01:46:31] Senator has the floor. Madam President, not only did I read the police report, I was there that day afterwards and I spent the next week there 20 plus hours a day. So I'm pretty familiar with this one. And I can tell you, Madam President, that that silencer, a silencer only works well and is silent or quiet when you use subsonic ammunition, which that individual did not use that day, Madam President. So those bullets that were shot through that .45 caliber pistol were heard and that's why a majority of the people ran out of the building but madam

[01:47:09] president i tell you that i had a couple of friends that were there that day and that building had turned into a no gun zone and the individuals that were there that day who prior to that did in fact carry did not have their firearms on them they were former law enforcement they were former special operators their former military and i can tell you madam president unlike some of the individuals in this qu in this chamber that are making decisions on who should and should not carry be able to possess specific firearms those individuals when the shots are fired

[01:47:45] they run toward the shots to stop them they don't run away from the shots madam president there's many members in this in this chamber today that have stood up for the call of duty both from the military and from in law enforcement and even today when they hear shots fired they don't turn and run from it they run toward it to help and assist thank you madam president i would hope everybody in this chamber would understand what this means and would vote against this bill thank you seeing

[01:48:19] no other senators who wish senator from central fairfax thank you madam president if i could briefly close out senator has the floor thank you madam president uh madam president we have heard a lot of folks uh you know talk about different things uh this this bill the way it's written no law-abiding citizen should have problems uh following it the other part about this is this does not ban possession in any way uh the people that are law enforcement that are military that that are FFL dealers, those are the folks that have the proper training and the licenses

[01:48:57] in order to carry these, in order to sell to other dealers. They're all in this bill to the point where this is specifically trying to make sure we keep the weapons of wars off our streets. And the last thing I will say is that when we talk about active shooting, when we talk about mass shootings, we're really thinking about the fact that kids now, I've gone to Fairfax County public schools, I've gone through fire drills, I've gone through a lot of drills, but have never had to go through an active shooter drills. Kids nowadays, that's their reality is that every single

[01:49:37] school year they have to go through an active shooter drill that the generations before them did not need to go through. That is something we have to remember that we're putting this into law to ensure that the next generation of children, the next generation of people that look at us to say we are one of the reasons why they don't have to go through those drills because we made sure that a place that they call schools or home, wherever it may be, is a safe place. So Madam President with that I ask and renew my motion that we agree and concur with the

[01:50:13] House amendments the question is shall the Senate concur with the House substitute for Senate bill 749 all in favor of that motion will record their votes aye those opposed no are the senators ready to vote have all the senators voted do any senators desire to change their vote the clerk will close the roll. [01:54:38] and speaking to that motion senator has the floor so this committee report is a it is a compromise between the two bodies and what it does is the house had put a reenactment clause on their version of the bill we did not over here in the Senate so in this compromise report we the house agreed to strip off the reenactment clause and we raised moderately the prescription level rates they now run between 150 and 300 which is higher than where we started out here in the senate but still within the range of rates that most people could be able to afford and so i think it still accomplishes the

[01:55:12] intent of the bill which is to help set a um a regular rate for prescriptions for folks who have cancer and other very serious medical conditions madam president and so with that i think this is a bill that helps deal with affordability and helps those who have very serious medical situations as an option for a type of insurance plan madam president that they could choose to adopt and with that i would move that we would adopt the conference report thank you madam president the question is shall the senate adopt the conference committee report for senate bill 161. all in favor of that motion will record their votes aye those opposed no are the senators

[02:24:42] This is an important step if we want to improve access to primary care. Virginians have suffered a loss of primary care practitioners. This bill tracks the independent practice authority that nurse practitioners currently enjoy in our current statute.

However, there are several technical amendments that were raised from stakeholders afterwards. It first clarifies that on-demand microtransit does not trigger the

[02:30:22] bill's parking caps and keeps the focus on fixed route transit infrastructure instead. And second, it clarifies that the bus rapid transit disqualify as transit under the bill and lastly it provides flexibility for large dense communities to maintain parking standards the question is shall the floor substitute be agreed to all in favor of that motion will say aye aye those opposed no the ayes have it the floor substitute is agreed to senator from henrico i now move full passage of the legislation and having explained the version that is before us i hope we can move

Again, this is an insurance program, there will be actuarial studies, there will be adjusters who will determine whether or not there are qualifying events. They will not be

[02:33:24] left up to the employers. Small contributions from the employee and the employer. Again, this still is going to need a little bit more work, but this moves us forward and I move that we pass the bill. The question is, shall House House Bill 1207 pass.
