

USE OF GENERATIVE ARTIFICIAL INTELLIGENCE

Loudoun County Public Schools (LCPS) aims to enhance learning through smart adaptive technologies, including Generative Artificial Intelligence (Generative AI).

A. Guiding Principles. The following principles ensure that Generative Artificial Intelligence integration supports the Division's core values and strategic priorities to improve the instructional and workplace environments for students, teachers, and staff, while safeguarding the rights of its community.

1. Holistic Support. LCPS' use of Generative AI should enhance the inclusivity and safety of the educational environment for all students and staff.

2. Equity and Opportunity. LCPS' use of Generative AI should ensure equitable access to educational resources and opportunities for all students and staff.

3. Trust Through Listening. LCPS strives to foster trust in the use of Generative AI by prioritizing transparency, communication, and stakeholder engagement.

4. Rigorous Teaching and Learning. LCPS strives to leverage Generative AI to elevate the rigor of our curriculum and teaching effectiveness.

5. Individualized Success. LCPS commits to recognizing and nurturing each student's unique strengths through Generative AI-supported flexible learning pathways, seamlessly integrating with our current instructional framework.

6. Continuous Improvement. LCPS commits to a culture of perpetual growth and sustainability in Generative AI use, assessing impact and adapting over time.

B. General Policy on Generative Artificial Intelligence. Only approved Generative AI programs may be utilized in student instruction or in completing student work. Staff should refer to [Regulation 5045-REG](#), Online Resources as Supplemental Instructional Materials, for additional information.

C. Monitoring and Review.

1. Annual Review. Generative AI programs approved for use by staff or students will be reviewed annually to ensure compliance with Division policies and state and federal student data privacy laws.

2. Compliance Oversight. The Departments of Digital Innovation (DDI) and Teaching and Learning shall be tasked with overseeing the approval and implementation of Generative AI programs.

USE OF GENERATIVE ARTIFICIAL INTELLIGENCE

D. Student, Teacher, and Staff Use of Generative AI.

1. Student Use of Generative AI. To ensure Generative AI is used in ways that support their learning, students will commit to:

- a. Using tools to enhance their learning and creativity responsibly and ethically.
- b. Working with peers and educators to explore and learn about Generative AI, fostering teamwork, and sharing knowledge.
- c. Practicing good digital citizenship habits, respecting privacy and online safety, and using Generative AI technologies responsibly for learning and collaboration.
- d. Being transparent about how and why they used Generative AI to support their own learning.

2. Teacher Use of Generative AI. To ensure Generative AI is used in ways that support safe learning, teachers will commit to:

- a. Evaluating Generative AI output to ensure it is accurate and aligned with professional expectations and modeling this human-centered approach for students.
- b. Being transparent about how and why they are using Generative AI to support instruction to educate students, colleagues, and families.
- c. Protecting the privacy of personally identifiable information about themselves or their students with any Generative AI tool.
- e. Being mindful of potential bias in any output generated by Generative AI and ensuring that all students have equal opportunities to learn about Generative AI and leverage it for learning.
- f. Acknowledging there is much to learn about Generative AI and modeling a growth mindset for students and colleagues.

3. Staff Use of Generative AI. To ensure Generative AI is used in ways that support operation efficiency, staff will commit to:

USE OF GENERATIVE ARTIFICIAL INTELLIGENCE

- a. Considering ways in which Generative AI can support innovation to solve complex problems.
 - b. Using Generative AI in ways that protect the privacy of staff, students, and families.
 - c. Striving to ensure the use of Generative AI is free from bias and results in outcomes that serve all students.
 - d. Being transparent about how and why Generative AI is being used.
 - e. Being mindful of the use of Generative AI in ways that protect Division information and uphold applicable laws and policies.
 - f. Using Generative AI in ways that further the mission and vision of LCPS.
4. Prohibited Use of Generative AI.
- a. Using Generative AI tools that are not provided and/or authorized by the school Division.
 - b. Relying solely on Generative AI for eligibility decisions, IEP generation, placement decisions, grading, or course design without review of a teacher or staff member.
 - c. Sharing personally identifiable information with Generative AI programs.

E. Academic Integrity Statements. Students are referred to and expected to uphold all standards set forth in the *LCPS Student Rights and Responsibilities Handbook for Families (SR&R)* and *LCPS' Student Code of Conduct*.
