

WIRELESS NETWORK FACILITY COLOCATION

The purpose of this policy is to establish a process for which outside agencies can solicit permission to collocate mobile and land-based network facilities on Loudoun County Public Schools (LCPS) property for the purposes of wireless distribution.

A. Eligibility for Placement. As of October 1, 2024, wireless network facilities may not be considered for location on LCPS property that includes an elementary, middle, or high school. Any school site that has been approved by the School Board prior to October 1, 2024, will continue to be eligible for placement for wireless network facilities.

B. Factors for Consideration. Notwithstanding and subject to the eligibility restrictions provided in section A above, wireless network facilities will be considered for collocation on LCPS property that is not otherwise restricted by lease terms or land use restrictions that cannot reasonably be anticipated to be modified, where:

1. There is an identifiable benefit to LCPS and/or the communities the network facilities will serve;
2. Adequate and readily available space exists;
3. The site selection will include health, safety, and security considerations for students, staff, and the surrounding community;
4. They can be effectively integrated into currently existing manmade structures, and/or natural features, such as light poles and trees;
5. Wireless network facilities include accommodation for future LCPS and Loudoun County agency equipment;
6. Wireless telecommunications facilities will not interfere with the school learning environment; and/or
7. There is a revenue-generating opportunity for the benefit of LCPS.

C. Process. The Superintendent or designee, may, in instances where the criteria set forth by this policy's accompanying regulation have been satisfied, recommend consideration by the School Board for the installation of mobile and land-based network facilities for wireless distribution. The installation of mobile and land-based network facilities on LCPS property requires a minimum of one (1) public hearing and approval of the Loudoun County School Board. The School Board's consideration will include whether a facility may be collocated on a particular property, as well as the specific location on the subject property.

D. Discretion of the Superintendent. Notwithstanding and subject to the School Board's ultimate approval, the Superintendent or designee must consider each of the factors in Section B in reviewing the proposals of such mobile and land-based network facilities on LCPS property and may recommend the approval of facilities that do not satisfy any or all

WIRELESS NETWORK FACILITY COLOCATION

of those factors, with the exception of facilities that do not conform with section B. 3, if the Superintendent or designee determines that the benefit to LCPS outweighs the factor or factors that would have been satisfied.

E. Revenue. Revenue generated will be applied to LCPS General Fund.

F. Testing. Wireless network facilities shall be required to be in compliance with all FCC standards, and a radio frequency analysis report of the facilities shall be provided showing the results of such radio frequency analysis no less frequently than once every calendar year.
