

NAMING SCHOOL FACILITIES

The Loudoun County School Board has the sole authority to authorize the naming of areas of school facilities, grounds, and/or programs in honor or recognition of a significant educational contribution either to Loudoun County Public Schools or an individual public school. This regulation applies only to areas of school facilities, grounds, and/or programs and does not apply to naming entire school facilities as addressed in Policy 6510: Naming School Facilities.

A. Standard Signage. LCPS will provide standard signage to identify areas of school facilities, grounds, and/or programs that are named through a Loudoun County School Board resolution.

1. Signage Type. LCPS will provide and install standard signage in the area that was named. This signage will identify the name of the area from the School Board resolution, as well as the date that the resolution was passed by the School Board. The design of the signage will be the same in all locations.

2. Implementation. The Department of Support Services will design a standard sign to be installed, either on building interior walls or on posts in exterior areas. Schools with areas already named by an active School Board resolution prior to 2021 will be provided with the option to have standard signage installed.

3. Exceptions

- a. Sponsorship: Areas of school facilities, grounds, and/or programs that are sponsored for payment, either financial or in-kind, will not be marked with a standard LCPS sign. In these scenarios, as desired, schools may work with the sponsor to fund signage.
- b. Additional signage: Variances from the standard signage, or additional signs, will be the responsibility of the school or an outside funding organization. The Department of Support Services will review each proposal for additional installed signs.
