

CHANGING SCHOOL ATTENDANCE ZONES

This Regulation supplements School Board Policy 6530, Changing School Attendance Zones, by outlining the staff processes that will be followed when a school attendance zone change has been initiated.

A. School Engagement Committee. A School Engagement Committee (SEC) will be formed that consists of school principals (identified attendance zone study area), staff from the respective Loudoun County Public Schools (LCPS) Departments of Academics, School Leadership, Support Services and others, as needed.

1. The SEC will meet to assess issues and student information for development of a staff recommendation(s) to be presented to the School Board for consideration.

2. SEC meetings are for staff only and will not be open to the public.

B. Dissemination of Information and Public Communication.

1. All information and data generated by staff for the School Board in association with an attendance zone change process will be posted on the LCPS website to be uniformly available to the public and School Board.

2. To maintain neutrality and impartiality, staff will not directly engage or communicate with members of the public, except as provided below:

- a. Staff may respond to written attendance zone inquiries from members of the public by posting answers to such submitted questions on the LCPS website, and subsequently providing a website link to the answers for members of the public initiating questions.
- b. Staff may respond to individual public inquiries of a non-substantive or general nature regarding an attendance zone change process, assist members of the public in accessing the publicly available attendance zone change information and data and/or facilitate the public's understanding of a particular attendance zone plan under consideration by the School Board.
- c. Staff may refer individual public inquiries to members of the School Board and/or to the LCPS website, where all public information and data associated with an attendance zone change process will be made available.
