

PROCEDURES FOR DEALING WITH COMMUNICABLE DISEASES

The following procedures guide school and departmental administrators who identify or suspect communicable disease in the school or work setting.

A. Contact the Supervisor of Student Health Services when a communicable disease is suspected. The Supervisor of Student Health Services will contact the Loudoun County Health Department to obtain guidance and to assist in making decisions regarding exclusions.

B. If it is the judgment of the Loudoun County Health Department, after consultation with private physicians or other public health officials, that an infectious or communicable disease is present in the school division and that there is a significant risk of transmission thereof or that the risk of transmission is unknown, the administrator in collaboration with the Supervisor of Student Health Services shall contact the superintendent and the employee will be excluded from school or the work place, until the Communicable Disease Review Panel is convened.

C. The Superintendent shall establish a Communicable Disease Review Panel consisting of the Supervisor of Student Health Services, a Loudoun County Health Department representative, the Assistant Superintendent for Personnel Services/designee and a school division representative to review all pertinent information and make recommendations to the Superintendent. Persons contributing information to the Panel shall include the attending physician, principal, immediate supervisor and employee.

D. A medical evaluation of the employee shall be obtained and the results submitted to the school division, for use by the Panel in making its recommendations.

E. The Panel will meet and review all pertinent information and make recommendations to the Superintendent within five (5) school days following the exclusion of the affected employee. The recommendations shall include, but not be limited to, review of a timetable regarding future school presence.

F. Within five (5) school days following his/her receipt of the report of the Panel, the Superintendent shall notify the affected employee of his/her decision to re-admit or to continue to exclude such employee from the school or workplace. Any person aggrieved by the decision of the Superintendent may appeal to the School Board.

G. Confidentiality and the right to privacy regarding the affected employee will be maintained by all persons involved.

H. All information regarding employees suspected of or diagnosed as having infectious, communicable or transmittable diseases shall be disseminated through the Department of Pupil Services.
