

REDUCTION IN FORCE

The policy for implementing a reduction in force action related to Loudoun County Public Schools employees involves the application of several steps, which are administered by the Department of Human Resources and Talent Development.

A decline in student enrollment, abolition of a particular subject or reduction in the number of classes offered in a particular subject, reorganization, budgetary consideration, the closing of a school, office or facility, elimination of a program, expiration of a special grant, or adverse economic or other conditions, as determined by the School Board, may require a modification of an instructional program that could result in a reduction in staff at one or more schools, program areas or departments, or for the entire school division. In such an event, the Division Superintendent will determine the positions that will be reduced or eliminated. The process for implementing this policy is outlined in Regulation 7910, Reduction in Force.
