

IMMUNIZATION REQUIREMENTS

This policy provides notice that students must satisfy immunization requirements per [§22.1-271.2](#) of the Code of Virginia, prior to enrolling in Loudoun County Public Schools. A student's immunizations shall be considered to be adequate if they meet the requirements as set forth in [§32.1-46](#) of the Code of Virginia.

A. Initial Requirements.

State law requires that no pupil shall be admitted for the first time to any school unless the school has been furnished with documentary proof of immunization from a licensed physician, registered nurse, physician assistant, advanced practice registered nurse or health department employee that the child either has been successfully immunized against communicable diseases as required by state law or has received at least the first series of all such vaccinations accompanied by a schedule of completion of the required doses. This certificate must be received prior to admitting the child to school.

If a child attended another school or school division and has school records which show that a certificate of immunization was furnished to the previous school, the principal shall accept the school records as verification of proper immunization. If a student does not have documentary proof of immunization, the school shall notify the adult student, or their parent, or legal guardian of the following: (1) that there is no evidence that the student has been immunized; (2) that the student may not be admitted without proof of immunization, unless the student is exempted, including any homeless child or youth as defined in subdivision A 7 of [§22.1-3](#); (3) that the student may be immunized and receive certification by a licensed physician, physician assistant, advanced practice registered nurse, registered nurse or an employee of a local health department; and (4) contact information for the local health department.

This immunization requirement applies to all children except (1) those whose parent, or legal guardian, submits an affidavit that this administration of immunizing agents conflicts with the student's religious tenets or practices or (2) those whose parent, or legal guardian, presents written certification from a licensed physician or health department that the administration of one or more of the immunizing agents may be detrimental to the health of the child or (3) a student who is a homeless child or youth and does not have documentary proof of necessary immunizations or has incomplete immunizations. As described in the federal Education for Homeless Children and Youth Program within the McKinney-Vento Homeless Assistance Act, as reauthorized under Title IX, Part A of the Every Student Succeeds Act (ESSA) the student will be admitted immediately and shall be referred to the McKinney Vento liaison who shall assist in obtaining the documentary proof of, or completing, immunization and other services required by such Act or (4) children of military families under the Interstate Compact on Educational Opportunity for Military Children without immunization documentation shall be enrolled and be granted 30 days from enrollment or within such time as provided by the Interstate Commission to obtain any immunizations required in Virginia. If necessary, the initial vaccinations must be obtained within the 30 days or within the time

IMMUNIZATION REQUIREMENTS

provided by the Interstate Commission.

B. Failure to Complete Immunization.

Any student whose immunizations are incomplete shall be admitted conditionally, if that student provides documentary proof at the time of enrollment of having received at least one dose of the required immunizations accompanied by a schedule for completion of the required doses within 90 calendar days. If the student requires more than two doses of hepatitis B vaccine, the conditional enrollment period shall be 180 calendar days.

The immunization record of each student admitted conditionally shall be reviewed periodically by health services staff until the required immunizations have been received. Any student admitted conditionally and who fails to comply with the schedule for completion of the required immunizations shall be excluded from school until immunizations are resumed. The principal or their designee shall notify the parent, or legal guardian, of the exclusion and follow the specified protocol for exclusion.

C. Record of Immunization.

The certificate of immunization or the parents, or legal guardians, affidavit of religious objection, or the physician's statement that immunization may be detrimental to the child's health shall be placed in the child's school records. The certificate of immunization and school records should contain the dates of all immunizations.

Upon order of the State Health Commission, any child who has not been immunized may be excluded from school during an outbreak, potential epidemic, or epidemic of a vaccine-preventable disease.
