

STUDENT MEDICATION

Student medication will be managed and administered per the Virginia Department of Education (VDOE) guidelines. All medication other than stock epinephrine, naloxone, and albuterol should be provided by the parent/guardian or adult designee. All student information will be confidential, per the Family Education Rights and Privacy Act (FERPA).

A. Training

1. Principals will designate at least two school staff, in addition to the health office staff member, to receive training in medication administration and to serve as the health office back-up support.

2. Annual training is required for all staff administering medication to students. Training is provided by Registered Nurses and aligns with VDOE guidelines and will be conducted in accordance with the most current edition of the [VDOE's Manual for Training Public School Employees in the Administration of Medication](#).

B. Health Office Procedures

1. All medication must be delivered to the school health office by the student's parent/guardian, or adult designee. Students may not generally transport medication to and from school. In instances where students are permitted to carry medication, parents/guardians, or adult designee, must initially deliver the medication to the school health office, along with the health care providers' orders that authorizes the student to carry such medication. Such procedures must be followed at the beginning of each subsequent school year.

2. The following guidelines shall be followed by health office staff, substitutes, and designated back-ups:

- a. Health office keys will be secured in the designated vault or other secure location within the school each night. Staff are prohibited from taking keys home.
- b. Rescue inhalers, Albuterol inhalers/holding chambers, epinephrine auto-injectors, stock naloxone, and glucagon will be kept unlocked during the school day and locked at night. All other medications will be locked when not in use.
- c. Controlled medications require double locking. All controlled medications will be stored in a lockbox that has been secured inside of a drawer or cabinet that is kept locked.

STUDENT MEDICATION

- d. Controlled medications will be counted with the parent/guardian, or adult designee, and an LCPS staff member when brought to the school. The following guidelines will be followed by health office staff, substitutes, and designated back-ups.
 - i. Controlled medications will be counted by two LCPS employees at the end of the last day of each week, in the morning on the first day of each week, and prior to and after a staff change in the health office. All other days, controlled medication will be counted by the health office staff member.
 - ii. A pill counter will be used when pills, caplets, or capsules are being counted.
 - iii. All medication counts will be documented and signed on the LCPS Controlled Meds form.
 - iv. If there is a concern that medication is missing, Student Health Services will be notified immediately. If the medication cannot be accounted for, law enforcement will be notified.

3. The six rights of medication administration shall be followed each time medication is administered—*i.e.*, (1) identify the right student; (2) verify the right medication; (3) calculate the right dose; (4) make sure it's the right time; (5) verify the right route; and (6) confirm the right documentation is completed reflecting the administration.

4. Administering medication safely is a priority. Medication errors shall be reported immediately to the Student Health Services Office. Medication errors are defined accordingly, and staff shall follow the procedures below:

- a. Medication errors include:
 - i. Giving the wrong medication.
 - ii. Giving the wrong dose of medication.
 - iii. Giving the medication at the wrong time.
 - iv. Giving a medication via the wrong route.
 - v. Not giving a scheduled dosage of medication.

STUDENT MEDICATION

- b. If a medication error is discovered staff must:
 - i. Contact Poison Control for guidance if the wrong medication was given, or a higher dosage of the medication is given than the dosage ordered. Call 911 if directed by Poison Control or if emergency care is required.
 - ii. Notify a Resource Nurse or Student Health Services immediately.
 - iii. Notify the parent and the principal.
 - iv. Complete a Medication Error Report and review with a Resource Nurse or Student Health Services staff.

5. Safely handling medication and medical supplies is important. The following guidelines should be followed:

- a. Staff shall wash their hands before and after administering medication.
- b. Staff shall wear gloves when:
 - i. Administering eye drops, ear drops, nose drops or injectable medications
 - ii. Applying ointments or lotions
 - iii. Administering an injection
 - iv. Counting pills, caplets, or capsules
- c. Needle Management after injections shall include the following precautions:
 - i. Place the needle in the LCPS sharps container immediately after injections. LCPS staff do not re-cap needles.
 - ii. Students may re-cap their own needles if they choose.
 - iii. If a student is unable to remove needles from insulin pens or lancets from lancing devices, LCPS staff may use a hemostat (clamp) to remove the needle and place it in a Sharps container.

STUDENT MEDICATION

6. LCPS staff will not administer intravenous medications.

7. Sunscreen shall not be administered or applied by LCPS staff. Students may carry and apply sunscreen to themselves but may not share with other students.

C. Stock Epinephrine

1. LCPS provides at least two (2) doses of stock auto-injectable epinephrine in each school, to be administered by a school nurse or employee of the school board, who is authorized and trained in the administration of epinephrine to any student believed to be having an anaphylactic reaction on school premises during the academic day.

2. Epinephrine should be administered promptly at the first sign of anaphylaxis, according to the [Virginia School Health Guidelines](#).

3. The school division shall maintain a sufficient number of doses of epinephrine for replacement of used or expired school stock. The following procedure will be followed for storing and monitoring used or expired stock epinephrine:

- a. The Resource Nurses will replace used or expired school stock in the health office.
- b. Resource Nurses will deliver replacement stock for athletic trainers to the School Health Office for the replacement of used or expired school stock in the Athletic Office by the Athletic Trainer or Athletic Director.
- c. The Office of Student Health Services will be responsible for distributing, reviewing storage, and monitoring the expiration dates for the epinephrine stored in school health offices.
- d. The Athletic Director will be responsible for reviewing the storage of epinephrine in the Athletic Office.
- e. The Office of Student Health Services will be responsible for monitoring the expiration dates and replacement of epinephrine stored in the Athletic Office.

4. Parents of students with known life-threatening allergies and/or anaphylaxis should provide the school with written instructions from the student's authorized licensed medical provider for handling anaphylaxis and all necessary medication for implementing the student specific order on an annual basis.

STUDENT MEDICATION

5. [Policy 8420](#), regarding stock epinephrine, is not intended to replace student specific orders or parent provided epinephrine.
6. Stock epinephrine will not be available for activities that are not on the school campus (including transportation to and from school and field trips).
7. LCPS shall designate an authorized medical provider to prescribe non-student specific epinephrine for the school division, to be administered to any student believed to be having an anaphylactic reaction on school grounds, during the academic day. The standing orders must be renewed annually and with any change in prescriber.
8. Staff shall utilize the Recognized Anaphylaxis Symptoms flowchart to determine when stock epinephrine should be administered to a student. The flowchart will be posted in every school health office near the stock epinephrine.
9. The follow procedure will be followed when epinephrine is administered:
 - a. Call 911, Emergency Medical Services (EMS).
 - b. Contact parents or guardians as soon as possible after EMS has been notified.
 - c. EMS shall transport the student to the hospital for further monitoring unless a parent/guardian is present to request a release of the student from EMS care at the school site. LCPS will not honor a parent/guardian's refusal of EMS services over the phone.
 - d. Document the use of stock epinephrine in the student health record located in the Student Information System.
 - e. Students will not be permitted to return to school or participate in school sponsored events on the same day as receiving epinephrine.

D. Stock Albuterol

1. LCPS provides at least one (1) undesignated stock albuterol metered dose inhaler and valved holding chamber in each school, to be administered by a school nurse or employee of the school board, who is authorized and trained in the administration of albuterol to any student, who, in good faith, needs such medication.

STUDENT MEDICATION

2. At least two (2) school employees will be trained to administer stock albuterol and should also be Cardiopulmonary Resuscitation (CPR) certified. Training for school personnel, in the administration of albuterol shall be conducted on a regular basis by a registered nurse according to the [Guidelines for Use of Undesignated Stock Albuterol in Schools](#).
3. Albuterol should be administered promptly at the first sign of asthmatic crises or respiratory distress, according to the [Virginia School Health Guidelines](#) and the [Guidelines for Use of Undesignated Stock Albuterol in Schools](#).
4. The administration of undesignated stock albuterol may be used in the following situations:
 - a. If the student has a current Asthma Action Plan but does not have their prescribed medication available, use the medical care plan provided by the healthcare provider for the student and the school's supply of undesignated stock albuterol inhaler with valved holding chamber.
 - b. If there is no Asthma Action Plan and the student is having difficulty breathing use the school's standing order and the school's supply of undesignated stock albuterol inhaler with valved holding chamber.
5. The following procedure will be followed for storage and monitoring of stock albuterol:
 - a. Undesignated stock albuterol medication will be stored in the health clinic according to manufacturer's recommendations. Storage will be in a secure location with the medication clearly marked and accessible during the school day.
 - b. Health office staff will monitor the medication in the health office during the school day. The medication will be locked in a secure location after school hours.
 - c. The Resource Nurses will monitor and replace used or expired school stock in the health office.
 - d. The Office of Student Health Services will be responsible for distributing, reviewing storage, and monitoring the expiration dates for the stock albuterol stored in school health offices.

STUDENT MEDICATION

6. Parents of students with known respiratory or asthmatic conditions should provide the school with written instructions from the student's authorized licensed medical provider and all necessary medication for implementing the student specific order on an annual basis.
7. [Policy 8420](#), regarding stock albuterol, is not intended to replace student specific orders or parent provided inhalers.
8. Stock albuterol will not be available for activities that are not on the school campus (including transportation to and from school and field trips).
9. LCPS shall designate an authorized medical provider to prescribe non-student specific albuterol for the School Division, to be administered to any student believed to be having an asthmatic crises or respiratory distress on school grounds, during the academic day. The standing orders must be renewed annually and with any change in prescriber.
10. Staff shall refer to the Virginia Department of Health (VDH) algorithm for [Severe Respiratory Distress](#) to determine when stock albuterol should be administered to a student and the dosage of stock albuterol that should be administered. The flowcharts will be posted in every school health office near the stock albuterol.
11. The following procedure will be followed when albuterol is administered to a student with mild to moderate respiratory distress:
 - a. Contact parents or guardians as soon as possible after albuterol has been administered and recommend the parent/guardian consult the student's licensed medical provider for follow up and guidance. Provide the parent with a copy of the LCPS [Asthma Classroom Emergency Action Plan](#).
 - b. Document the use of undesignated stock albuterol in the student health record located in the Student Information System.
 - c. Review, revise, or develop an [Asthma Classroom Emergency Action Plan](#), if necessary.
 - d. Thoroughly clean all equipment with an approved cleaner and per manufacturer recommendations and dispose of the valved holding chamber.
 - e. Immediately notify Student Health Services Staff or the Resource Nurse if the supply of stock albuterol is low.

STUDENT MEDICATION

12. The following procedure shall be used when albuterol is administered to a student with severe respiratory distress:

- a. Call (911), Emergency Medical Services (EMS)
- b. Contact the parent/guardian as soon as possible after EMS has activated.
- c. EMS shall transport the student to the hospital for further monitoring unless a parent/guardian is present to request a release of the student from EMS care at the school site. LCPS will not honor a parent/guardian's refusal of EMS services over the phone.
- d. Students will not be permitted to return to school or participate in school-sponsored events on the same day as transport to ER for respiratory distress.
- e. Document the use of undesignated stock albuterol and the EMS call in the student health record located in the Student Information System
- f. Review, revise, or develop an Asthma Classroom Emergency Action Plan, if necessary.
- g. If needed, provide the parent with a copy of the LCPS Asthma Action Plan/Physicians Order or a link to the document at LCPS.org.
- h. Thoroughly clean all equipment with an approved cleaner and per manufacturer recommendations and dispose of the valved holding chamber.
- i. Immediately notify Student Health Office Services or the Resource Nurse of the EMS call and if the supply of stock albuterol is low.

E. Stock Naloxone

1. Loudoun County Public Schools provides at least four (4) doses of undesignated naloxone, at each secondary school, to be administered by a school nurse or employee of the school board, who is authorized and trained in the administration of naloxone to any student believed to be in need of such medication.

STUDENT MEDICATION

2. At least two school employees, in addition to the health office staff member, will be trained to administer stock naloxone. These employees should also be CPR trained. Training for school personnel in the administration of naloxone shall be conducted on an annual basis. In addition, each middle and high school shall have three (3) Medical Emergency Response Teams (MERTS) identified. The AED team may be considered one of the designated MERTS.

3. Stock naloxone shall be administered promptly when a student is believed to be experiencing an opioid overdose and in according with the REVIVE! Opioid Overdose Reversal for Virginia training protocol.

4. Stock naloxone will be stored according to the manufacturer's recommendations and located in the top drawer of the school health office emergency cart which will be clearly marked and unlocked during the school day.

5. Health Office Staff will monitor the medication in the health office during the school day. The medication will be locked in a secure location after school hours.

6. The Student Health Services Office will be responsible for distributing, reviewing storage, and monitoring expiration dates for the stock naloxone stored in health offices. Resource Nurses will promptly replace used or expired stock naloxone in the school health offices.

7. Stock naloxone will not be available for activities that are held off the school campus (including transportation to and from field trips) nor for activities that take place beyond the school day.

8. The following procedure will be used when naloxone is administered to a student believed to be experiencing an opioid overdose:

- a. Call 911, Emergency Medical Services (EMS)
- b. Administer Naloxone per the REVIVE! Opioid Overdose Reversal for Virginia training protocol.
- c. Contact parents/guardians as soon as possible after naloxone has been administered.
- d. EMS shall transport the student to the hospital for further Monitoring, unless the parent/guardian is present to request a release of the student from EMS care at the school site. LCPS will not honor a parent/guardian's refusal of EMS services over the phone.

STUDENT MEDICATION

- e. Document the use of the stock naloxone in the student health record located in the Student Information System.
- f. Students will not be permitted to return to school or participate in school sponsored events on the same day they are administered naloxone.
- g. Immediately notify the Student Health Services Office and the Resource Nurse to report that naloxone was administered, and that EMS was called.
- h. Notify the School Unified Mental Health Team lead and the Student Assistance Specialist (SAS) that naloxone was administered.

F. CBD and THC-A Oil Product Administration

1. No student shall be suspended or expelled for use of CBD or THC-A oil products if they hold a valid written certification for the use of a CBD or THC-A oil products issued by a practitioner in accordance with subsection B of [§ 54.1-3408.3](#) for the possession or use of such oil products in accordance with the student's individualized health plan and in compliance with Policy 8420.

2. Parents/Guardians will provide staff with the [LCPS Student Form for Administration of CBD/THC-A Oil](#) standardized form to assist schools in the administration of CBD and THC-A oil products to students whose practitioners have recommended the use of the oils for treatment of, or to alleviate the symptoms of, a condition or disease. Parents/guardians of the student must have the *LCPS Student Form for Administration of CBD/THC-A Oil* completed by both the practitioner recommending the use of the oil and the pharmacist dispensing the oil at the pharmaceutical processor. Once completed, the form must be provided to the school and is valid for 12 months. Any changes in dosage administration during the 12 months must be noted by the practitioner or the pharmacist at the pharmaceutical processor on page three of the form and provided to the school.

3. In addition to the completed *LCPS Student Form for Administration of CBD/THC-A Oil* parents/guardian must provide the school with a signed parental/guardian consent form to administer pharmaceutically processed CBD or THC-A oil product to their student while at school.

STUDENT MEDICATION

4. Definition of Cannabis Oil for Use in School:
- a. "Cannabis oil" means any formulation of processed Cannabis plant extract, which may include oil from industrial hemp extract acquired by a pharmaceutical processor pursuant to [54.1-3442.6](#), or a dilution of the resin of the Cannabis plant that contains at least five milligrams of cannabidiol (CBD) or tetrahydrocannabinolic acid (THC-A) and no more than 10 milligrams of delta-9-tetrahydrocannabinol per dose." The pharmaceutically processed CBD, THC-A, or oil- based products that are permitted for use in school may contain up to five percent tetrahydrocannabinol (THC) and can only be obtained from a restricted number of sites permitted by the Virginia Board of Pharmacy. These products cannot be obtained from a pharmacy and should not be confused with over-the-counter, unregulated CBD (hemp) oils available at local stores and gas stations, which contain no more than 0.3 percent THC. "Cannabis oil" does not include industrial hemp, as defined in [3.2-4112](#), that is grown, dealt, or processed in compliance with state or federal law, unless it has been acquired and formulated with cannabis plant extract by a pharmaceutical processor.
 - b. "Cannabis product" means a product that is (i) produced by a pharmaceutical processor, registered with the Board, and compliant with testing requirements and (ii) composed of cannabis oil or botanical cannabis.

STUDENT FORM FOR ADMINISTRATION OF CBD/THC-A OIL

This form is intended to assist authorized persons to properly administer Cannabidiol (CBD) and Tetrahydrocannabinol Acid (THC-A) oil products to a public school student who has been issued a valid written certification for the use of CBD or THC-A oil in accordance with [§ 54.1-3408.3](#) of the *Code of Virginia*. It is not intended to address the administration of products produced from industrial hemp such as over-the-counter CBD oil.

Instructions:

- Page two of this form must be signed by both the practitioner issuing the written certification recommending the use of CBD or THC-A oil **and** the dispensing pharmacist at the pharmaceutical processor.
- If changes are made to the student's oil product, dosage, or frequency of administration during the school year, page three of this form may be completed by the certifying practitioner **or** the dispensing pharmacist at the pharmaceutical processor.
- Parents/legal guardians must provide the school with the completed form containing the most current dosing information to ensure the student receives proper administration.
- A separate form must be completed for each CBD/THC-A oil product to be administered to the student.
