

STUDENT LACTATION SUPPORT

Loudoun County Public Schools will support lactating students who choose to continue providing milk for their infants after returning to school and require resources during the school day to achieve this goal.

A. LCPS PRINCIPAL RESPONSIBILITY. Provide a supportive environment to enable lactating students “reasonable break times” and private, non-restroom locations, to express their milk during the school day. The area must also be ADA (The Americans with Disabilities Act) accessible. When more than one breastfeeding student needs to use the designated lactation room, a schedule will be developed by the principal or designee.

B. LACTATING STUDENT RESPONSIBILITY. Students who wish to express milk during the school day shall notify the school principal of their needs at least two weeks in advance so that they can collaborate on appropriate scheduling to satisfy the needs of the student. Students requesting lactation breaks are responsible for keeping their personal areas clean and tidy for the next user by wiping surfaces and discarding any of their personal use items.

1. The student shall supply her own equipment that is needed to support pumping.
2. The student will be provided with a space to store her breast pump equipment.
3. The student must be able to set up a pump, express breast milk and store it properly.
4. The student must remove milk from the school at the end of each day.

C. MILK STORAGE. Each student is responsible for proper storage of her milk using her own personal storage cooler if a designated refrigerator is not available.

1. Milk shall not be stored in a multi-use refrigerator.
2. Milk that is stored in a personal storage cooler or a designated refrigerator, if available, must include the mother’s name, date, and time the milk was expressed.
