

INFORMATION SECURITY PROTECTION (ISP)

This policy establishes the practices for protecting against compromise or loss of Loudoun County Public School (LCPS) information assets, including, but not limited to, educational, instructional, financial, personnel, and legal data stored in a variety of formats which include but are not limited to electronic, print, voice, and other.

A. Policy

1. Asset Protection. School Division assets will be protected in a manner that is consistent with contractual or legal obligations and is reasonable and appropriate for the level of sensitivity, value, and risk that the asset has to the School Division. Security measures will be employed regardless of the physical medium and location on which assets are stored, processed, transmitted or transferred. Such protection includes restricting access to assets based on a valid business or educational need. The administration will devote time and resources to protect assets.

2. Audits and Remediation. Data assets and information systems will be protected in a manner that meets applicable regulatory requirements and/or industry standards and that is at least as secure as other similar organizations handling similar information. To achieve this objective, annual reviews of the risks to School Division assets and information systems will be conducted. Similarly, whenever a major security incident indicates that the security of assets or information systems is insufficient, remedial action will be taken to reduce exposure. Annual reports reflecting division information security status and progress will also be prepared and distributed for review and action as needed.

3. Training and Awareness. Training and supporting reference materials are available to staff, students, consultants, and contractors to protect and otherwise manage School Division assets. Training materials communicate that information security is an essential component of School Division operations and should be treated similar to other sensitive operational functions such as business, finance, personnel, and instruction.

4. Information Asset Management. All School Division assets require a designated owner and custodian who is authorized to support, maintain, and distribute the data as required. Assets are classified on the basis of sensitivity and risk as identified in the Information Security Regulation.

5. Right to Review and Monitor. Unless explicitly noted in other administrative policies, the School Division retains the right to observe, review or audit all assets and activity conducted on the LCPS network, stored on division provided computers, storage media, and any other devices or systems.

INFORMATION SECURITY PROTECTION (ISP)

B. Exceptions. Under rare circumstances, certain users will need an exemption that is not compliant with these policies. All such instances must be approved in writing and in advance by the Chief Technology Officer for Digital Innovation.

C. Contact Point. Questions about this policy shall be directed to the Chief Technology Officer for Digital Innovation and/or the appropriate departmental level designee.

D. Compliance. Failure to comply with this policy may result in disciplinary or legal action.
