

PROCEDURES FOR DETERMINING GRADE POINT AVERAGE AND LATIN HONORS SYSTEM

The purpose of this Regulation is to establish procedures for determining grade point average (GPA) and a Latin Honors System.

A. Procedures for Determining Grade Point Average (GPA).

1. GPA is determined by using all courses for which credit was earned or could have been earned. Courses for which standard units of credit are awarded prior to high school are also included.
2. When a course is repeated, a GPA determination will include both grades attained in that course.
3. If a student withdraws from a full-year or semester course before the end of the first grading period of the course, the course is not recorded on the scholastic record, and a new report card is issued to reflect the change. For withdrawals from full-year courses during the second and third grading periods, the scholastic record will reflect WP (withdrawn passing) for the year or WF (withdrawn failing) for the year.
4. If a student withdraws from a full-year course during the last grading period or a semester course during the last grading period, the scholastic record will reflect a WP or F for the year. A course that a student has withdrawn from will only be counted in the student's GPA when an F is received.
5. In determining a GPA for a full-year course, the grade-point scale listed below is used. A semester course counts for one-half of the point value.

Grading Scale – Adopted at the beginning of the 2009-2010 school year.

Grade	Numerical Equivalent	Points Awarded
A+	98-100	4.3
A	93-97	4.0
A-	90-92	3.7
B+	87-89	3.3
B	83-86	3.0
B-	80-82	2.7
C+	77-79	2.3
C	73-76	2.0
C-	70-72	1.7
D+	67-69	1.3
D	63-66	1.0
D-	60-62	.7
F	59 and below	0.0

6. Grade Weighting. Certain courses are weighted by adding a 1.0 or 0.5 to the point value for the grade.

PROCEDURES FOR DETERMINING GRADE POINT AVERAGE AND LATIN HONORS SYSTEM

- a. Grades earned in Advanced Placement (AP), International Baccalaureate (IB), and Dual Enrollment (DE) courses are "weighted" by adding 1.0 to the point value for the grade earned in the course, with the exception of when an F is received.
- b. Multivariable Calculus is the only non-AP, DE, or IB course that will be "weighted" by adding 1.0 to the point value for the grade earned in the course, with the exception of when an F is received.
- c. Grades earned in courses designated by LCPS as Honors are "weighted" by adding 0.5 to the point value for the grade earned in the course, with the exception of when an F is received.
- d. Grades earned in courses labeled Academy of Engineering and Technology (AET) or Academy of Science (AOS) are "weighted" by adding 0.5 to the point value for the grade earned in a course, with the exception of when an F is received.

7. To determine a student's GPA, grade points for all courses for which a grade has been recorded are totaled and divided by the total number of courses for which the student was enrolled and for which the student received a semester or full-year grade. The GPA is computed to the rounded hundredths place.

B. Procedures for Determining the Latin Honors System.

1. The Latin Honors System recognizes students' individual GPA, as well as a high level of academic achievement for those in the top 5%, 10%, and 20% of their school senior class. This means there is variability from school to school within the percentile range.

2. The Latin Honors levels of distinction are defined as:

- a. Summa Cum Laude representing the top 5%;
- b. Magna Cum Laude representing the top 10%; and
- c. Cum Laude representing the top 20%.

3. GPAs are displayed on transcripts with a Latin Honors' designation for those students earning Summa Cum Laude, Magna Cum Laude, or Cum Laude. Student transcripts will include a key that explains the three levels of the Latin Honors System.
