

SUBSTANCE USE EDUCATION

A. Purpose. Substance use education is an important part of the instructional program in Loudoun County Public Schools. All students shall be educated in learning environments that are safe, free of substance abuse, and conducive to learning. LCPS provides instruction concerning substances and substance abuse as prescribed by the Virginia Board of Education.

B. Substance Use Education Objectives.

1. To provide a curriculum and resources that emphasize substance use education and prevention of substance use and abuse;
2. To provide information and services for students regarding the public safety hazards and dangers associated with underage marijuana use, underage drinking, impaired driving, prescription, synthetic, and hallucinogenic drug use, and the addictive potential thereof;
3. To educate students about the health and safety risks of using tobacco products, nicotine vapor products, and alternative nicotine products, gambling, and the addictive potential thereof;
4. To establish supportive prevention and intervention services for students who may experience issues related to substance abuse and to provide education regarding healthy alternatives and refusal skills for students who may experience peer pressure around substance use or other risk-taking behaviors.
